**A lot of cultures around the world have tried to explain earthquakes in different ways. Here are two popular legends about what makes the ground shake!**

**The Greek Legend**

At the beginning of time, ancient gods lived on Mount Olympus in the north of Greece. They fought a terrible war with the Giants over who will rule the world. During one of the battles, the goddess Athena killed the leader of the Giants, Enceladus. Then she threw the Island of Sicily on top of him and completely buried him. Since then, Enceladus occasionally moves and tries to escape from under the Island and this, they say, is how the earthquakes occur.

**The Native American Legend**

The Gabrielino Indians of California believed that when the world was covered in water, the Great Spirit decided to make a beautiful land with lakes and rivers. He told six turtles to carry the land on their backs. One day the turtles argued and three of them decided to swim east, while the other three swam west. They couldn't swim far because of the heavy land on their backs, and the earth began to shake and crack. In the end, the turtles understood that they could not separate so they stopped arguing. Unfortunately, every now and again the turtles argue and the earth shakes.
